

GEO-HEAT CENTER QUARTERLY BULLETIN

ISSN 0276-1084

**A Quarterly Progress and Development Report
on the Direct Utilization of Geothermal Resources**

CONTENTS	Page	PUBLISHED BY
<p>THE ROLE OF GEOTHERMAL ENERGY IN THE WORLD Ingvar B. Fridleffsson United Nations University Geothermal Training Programme</p>	1	<p>GEO-HEAT CENTER Oregon Institute of Technology 3201 Campus Drive Klamath Falls, OR 97601 Phone: 541-885-1750 Email: geoheat@oit.edu</p> <p>All articles for the Bulletin are solicited. If you wish to contribute a paper, please contact the editor at the above address.</p> <p>EDITOR</p> <p>Paul J. Lienau and John W. Lund Typesetting and Layout – Donna Gibson</p> <p>FUNDING</p> <p>The Bulletin is provided compliments of the Geo-Heat Center. This material was prepared with the support of the U.S. Department of Energy (DOE Grant No. DE-FG07-90ID13040). However, any opinions, findings, conclusions, or recommendations expressed herein are those of the authors(s) and do not necessarily reflect the view of USDOE.</p> <p>SUBSCRIPTIONS</p> <p>The Bulletin is mailed free of charge. Please send your name and address to the Geo-Heat Center for addition to the mailing list.</p> <p>If you wish to change your bulletin subscription, please complete the form below and return it to the Center.</p> <p>Name _____</p> <p>Address _____</p> <p style="text-align: right;">_____ Zip _____</p> <p>Country _____</p>
<p>DIRECT HEAT UTILIZATION OF GEOTHERMAL RESOURCES John W. Lund Geo-Heat Center</p>	6	
<p>SELECTED COST CONSIDERATIONS FOR GEOTHERMAL DISTRICT HEATING IN EXISTING SINGLE-FAMILY RESIDENTIAL AREAS Kevin Rafferty Geo-Heat Center</p>	10	
<p>KLAMATH FALLS GEOTHERMAL DISTRICT HEATING SYSTEM EVALUATION Brian Brown, P.E. Mechanical Engineer</p>	16	
<p>OIT GEOTHERMAL SYSTEM IMPROVEMENTS Paul J. Lienau Geo-Heat Center</p>	24	
<p>GEOTHERMAL PIPELINE Progress and Development Update From the Geothermal Progress Monitor</p>	29	
<p>Cover: The U.S. Geothermal projects and Resources map identifies 23 operating geothermal power plants with a capacity of 2,817 MW and 15 planned power plants. The installed thermal power for direct-use is 1,874 MW including geothermal heat pumps (59%), and the following number of direct-use project sites: 17 district heating, 976 space heating, 38 greenhouses, 28 aquaculture, 12 industrial and 190 resort/spas. In many cases, the icons on the map represent multiple projects at individual sites. For example in Klamath Falls, there are 577 space heating projects and two district heating systems.</p>
